

**Inspect. Maintain.
Rehabilitate. Relax.**

 **Visu-Sewer**
Inspect. Maintain. Rehabilitate.

When you choose Visu-Sewer, you get more than a wide selection of services for every trenchless need from inspection to rehabilitation. You also get nearly a half century of reliable service and proven success.

We have seen our customers' needs change dramatically over the past few decades, and we have stayed one step ahead by seeking out the most current, state-of-the-art solutions for the inspection, maintenance and repair of our nation's decaying collection systems.

Finding the right technology and equipment is just the beginning. Our reputation (and your success) depends on experienced, knowledgeable and highly-trained crews. Rest assured that when you choose Visu Sewer, you choose more than quality trenchless service. You also choose the most reliable and comprehensive resource available for the inspection, maintenance and rehabilitation of collection systems.

Inspect.

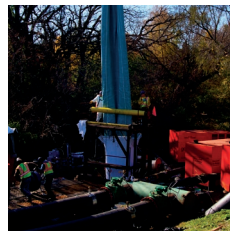

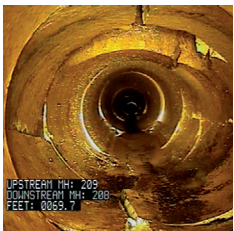

Understanding the exact condition of your system is not a guessing game, inspection is the crucial first step to well-maintained pipes. That's where we come in. With our high-resolution video we help you locate problems before they become emergencies. Our inspection services include:

- Inflow & Infiltration Investigations

- Dye Water Flooding
- Manhole Inspections
- Smoke Testing

- Video Inspection

- Color, Pan & Tilt Cameras with Transporters
- Lateral Evaluation Televising Systems (LETS)
- Man Entry, Mini-Cams, Manhole Pole Cams
- Digital Recording Media

Maintain.

Our highly trained personnel use state-of-the-art equipment and materials to ensure that your pipes are operating at peak performance. We have the ability to maintain any type of underground structure including catch basins, sanitary sewers, combination sewers and storm drains by providing the following services:

- Pipe Cleaning and Jetting

- Root Cutting
- Protruding Tap Removal
- Mineral Deposit Reaming

- Vacuum Service

- Debris Removal
- Tank Cleaning
- Hydro-Excavating

We also offer our customers peace of mind through our comprehensive **maintenance contracts**, designed to keep one step ahead of potential maintenance issues.

Rehabilitate.

There are many levels of rehabilitation. As a complete solutions provider, we will work with you to first evaluate the situation and then recommend the best plan of action. We know that every job and every customer is different. So while there is no simple answer, with complete and thorough evaluation, there is always a simple solution.

- Mainline Pipeline Rehabilitation

- Cured-in-Place Pipe (CIPP)
- Storm Seal Cementitious Pipe Lining

National  Liner®

Relax.

Take a break from the stress of anticipating and managing your collection system maintenance and rehabilitation. No matter what your unique diagnosis and treatment needs may be, we've got you covered.

As one of the oldest and largest full-service sewer inspection, maintenance, & rehabilitation companies, Visu Sewer is uniquely positioned to identify, evaluate and solve your collection system problems with a wide variety of cost effective solutions. This vertical integration is what sets us apart from companies that offer one solution for all sewer problems.

Research shows that our customers come to us because of our reputation, but they stay with us because of our reliable service and excellent customer support. Our decades-long proven history of trenchless solutions is also why many have been with us for ten years or more. We want to make your life easier, too, so please visit us at www.visu-sewer.com to learn more.
